PRESIDENT'S ADVISORY
PANEL
ON FEDERAL TAX REFORM

Mr. Connie Mack, Chairman and Mr. John Breaux, Vice Chairman
President's Advisory Panel on Federal Tax Reform
1440 New York Avenue Suite 2100
Washington, DC 20220

I salute you with the highest of regard and respect, as I realize you have taken on a job that some might think next to impossible. Fix the tax system.

~~Allow me to send you a copy of a communication addressed to President Bush in December of 2004, with a single page attachment of a great Income Tax system.~~

Sirs, I am not a part of any organization, just a simple old man of 78 years, and an uneducated individual that found a reason to promote a simple and easy to understand taxation system to fund government operations.

The system had to be fair and just to one and all, plus it had to have no variables, such as deductions, so it could be in time become automated, as mentioned in the last paragraph on the single page containing this suggested new income taxation system. This new Income Tax system is a total product of my own thinking, and I consulted with no others on the matter.

President George Bush's call for reform of the Income Tax was heaven sent for me and I mean that literally. The right man in the right Office, the very best and the wisest of Presidents to have come along in my lifetime. A man that "says what he means and means what he says". Only foolish people ignore or fly crosswise to Mr. Bush's words, and at their own peril, as some have learned the hard way.

President Bush appointed the nine Member Advisory Panel with Executive Order 13369 which contained two Income Tax deductions. How to come up with different options on taxation and yet have these be revenue neutral is a very tall order. My suggested Income Tax plan does that exactly. And it is simple, as required by Mr. Bush's original statement of November 4, 2004.

So this Tax Plan can fulfil the criteria of having at least one Recommendation based on an Income Tax system cited in the President's Executive Order 13369.

May I call your attention to the last paragraph of the Attachment where the claim of automation potential is made. Nor am I confusing computerized with automated. I am talking real and full automation using computers of course. This nation should take advantage of our science and technology, and reduce the cost of collecting the taxes to perhaps less than 10 percent of present cost. And have no tax returns or tax year. And there could be no tax cheaters. All of this is not for the immediate time, such takes a few years, in five years, but more likely seven years. And this should be operated by private industry. Not a thing for me or mine. We are not qualified, and have other future plans.

With this time lag in mind, include the two deductions cited by President Bush of home mortgage interest and charity deductions and there would be a need for one more allowance necessary, that of child care so both parents or a single parent could work and earn a taxable income. Those two deductions would only be temporary and the two would later go bye-bye.

Now this tax plan can stand alone on it's own merit, it is the best of all tax plans presently being put forth. But there is a much more compelling matter. Having designed a better mousetrap, the need would exist of a method and means to serve as a starting point and I selected the income tax as the best possible vehicle to introduce and get this mousetrap on the road. My label or alias for now of this other matter is the Profound Tool and for the time I want to say very little about the PT, since I consider it an intellectual property and intend to sell it. Being 78, I want to accomplish the sale this year. PT is about the nation, not about me. I am only the cook, and a real nothing. With PT many problem evils disappear. To cite just one, illegal aliens, Mexican common laborers or terrorists. None will enter. Another, illegal drug trafficking, banished and gone. Mighty PT never blinks/nods.

Would the Advisory Panel please allow me to testify before it? You might find it of some interest and worthwhile. And would the Tax Panel be receptive to coming to Birmingham for a Hearing? I can and will go where the Panel decides. Both the wife and I are retired and exist on quite limited funds. SS and a tiny savings.

Saturday, December 25, 2004 Merry Christmas and Happy New Year to you and
yours.

President George W. Bush
The White House
1600 Pennsylvania Avenue
Washington. DC 20500

Dear Mr. President,

Might I respectfully submit a proposal for a total revamping of the Income
~~Tax System. It is a condensed single page listing only three changes~~ and I
think it worthy of your time to read prior to sending it over to the Secretary
of the Treasury Snow. Allow me to testify before the Snow Commission.

It contains a simple and easy understandable Income Tax System, just and
fair to one and all. That is not true for the Federal Sales Tax, the Sales Tax
is an unjust, unfair, and a cruel and callous attempt to cover past mistakes
by the same people who got us into the mess of today. And the Sales Tax
will not solve the problems, the Sales Tax will only greatly compound the
problem, plus create some new inherent ills and evils, and devastate the land.

Have heard some of the Sales Tax proponents glib statements and proffers of
a \$4280 sweetener federal tax grant. Why does the federal government feel or
think such a huge sweetener grant is necessary???? The Legislators and the
Executive know exactly what is going to happen with this money. Most
taxpayers will do precisely as did the federal government with the SS funds
reserve. Consider it as a windfall and spend the \$4280 tax grant immediately.
~~Yes, taxpayers can be conned and duped~~ by wily professional politicians.

Mr. Rumsfeld is a much admired giant amid crass midgets. And you sir, just
happens to be the best President of my 78 years. Mr. John Ashcroft completes
my choice of The Three Wise Men of Today. I cannot conceive that you
would ever impose or allow a brutal 23 percent Sales Tax on the poor and
elderly of this nation. Retired folks that have lived past taxable income days.

God bless you,

Ben Turner

OVERHAUL THE PERSONAL INCOME TAX SYSTEM

!!!!!!

THREE CHANGES AND WE CAN HAVE A BRAND NEW INCOME TAX SYSTEM, THAT IS SIMPLE BEYOND WORDS, JUST AND FAIR TO ONE AND ALL.

CHANGE ONE;

The income taxation will apply to each and every person on an individual basis.
~~W/Required and necessary provisions.~~ NO JOINT TAX RETURNS.

CHANGE TWO;

The income taxation will be levied on each individual's total income.
W/Required and necessary provisions. Including defining taxable incomes.

CHANGE THREE;

The income taxation will be on a graduated basis from 0? percent to 32? percent.
W/necessary requirements to produce and publish an income tax chart of approximately 200 graduations of income to cover all incomes, using the prior year records of the IRS to produce the required data. This would be in order to arrive at a fully informed taxation rate, instead of guess work. And to have assurance of the dollar figure yield of the personal income taxation.

How this would be accomplished is this. First determine the 200 brackets of income and then submit this listing to the IRS. Have the IRS come up with the number of incomes fitting each of the income brackets and this is the sole ~~data needed from the IRS.~~ The data is available from the prior year returns and this includes joint returns.

The same method of withholding and quarterly estimations will be used as used in the present income tax system. This should perhaps be changed to monthly estimations.

There would be a need for the filing of an annual income tax (one page) return, but only for the present time and for the initial years. And this specific tax plan could become an automated process, where no tax return filings will be necessary. In due time the tax year will become a relic of history. Ditto IRS.
